# Class of its own

## Pace-setter.

**900 plates a day.** SelectT cultures multiple cell-lines fast – combining increased productivity with superbly engineered precision.

Features like the secure barcode tracking system, unattended operation and three-application versatility put SelectT into a class of its own.

The footprint maybe small but SelectT packs plenty of oomph.  
Check the smallprint and then why not book a test drive now?

Automated cell culture system

# SelectT

The world's first automated solution to culture 1 to 182 mammalian cell-lines simultaneously and generate assay-ready plates on demand

THE  
AUTOMATION  
PARTNERSHIP

Ideal for assay development, HTS and lead optimisation. 900 plates a day. Approx. 180,000 plates between services. Footprint: 9ft x 6ft 6ins (2.7m x 2m). Delivery: 5 months from order. Easy payments. 12 months warranty. Comes with secure barcode tracking systems. Air filters, operator safety systems and TAP's 14 years' cell culture automation experience as standard. Designed and developed with GSK, Merck, Pfizer, BMS, AstraZeneca.

# 5 careful owners

## Road tested by the top pharmas.

### **You told us what you needed.** We listened.

SelectT combines our 14 years' automated cell culture experience with your application know-how and pressing business needs.

Fast performance rated at 900 plates per day. Complete traceability of every cell-line. And multi-talented to deliver three times the value.

# Cruise control

**24/7 unattended operation. Assay-ready plates on Monday morning.**

**SelectT really motors.** SelectT just cruises along to give you a head start on the week's assays. Security is tight with on-board computer systems tracking every cell-line for full traceability.

Add to that SelectT's multi-purpose capability to handle three applications in one for three times the value and you'll want to take a closer look.

# Economic to run

**Low maintenance. Long service intervals. Compatible with major labware vendors.**

**180,000 plates between services.** Three applications in one system. Freedom to choose your own labware supplier. A small footprint and small wonder that SelectT is so cost-effective. Take advantage of the easy payment terms, short delivery and fast track to productivity gains.
